Race Furniture will plan your space to create an environment that promotes didactic and group learning. Providing a full service from project start to final installation

Saves space

Integrated power and data

Installed in universities across the UK and Europe

Award winning design

Connect

Connect is an award-winning collaborative and space efficient seating solution for learning environments.

Working with architects, Burwell Architects, Race Furniture has created **Connect**, an innovative learning environment that combines the need for collaborative group work with teacher focused lectures.

“The creation of this style of space has positively challenged the way we teach. The layout enables students to be engaged in a more effective way”

Dr Julie Holland. Director of the Glendonbrook Centre for Enterprise Education.

New pedagogic structures are defining student-student, student-teacher and student-information relationships. **Connect** provides the perfect learning environment for didactic or collaborative modes without any alteration. The design allows teachers to move around the room to interact effectively with students.

Connect improves...

layout

Connect introduces a new and innovative way of planning learning spaces.

As part of our service we are able to design each space using a selection of customised modules to optimise capacity and group formation.

The **Connect** layout allows the lecturer move around the room for increased interaction with all the students.

Connect is...

collaborative

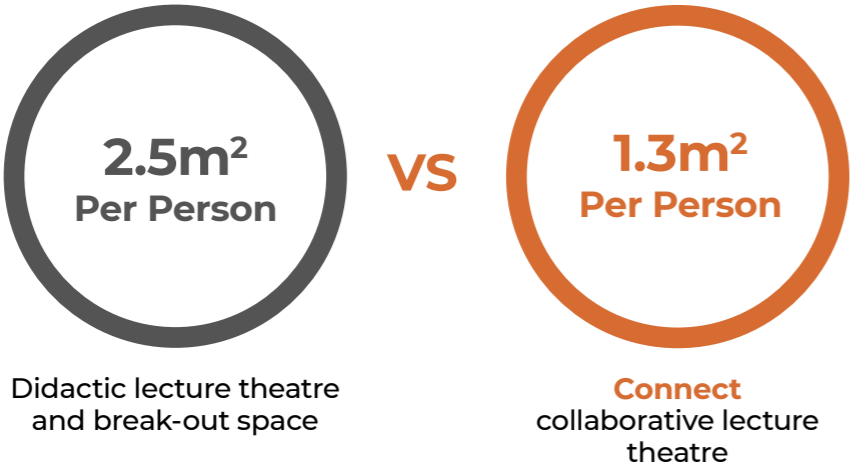

Allowing students to work **collaboratively** in groups with a clear **view to the lecturer**

Connect is...

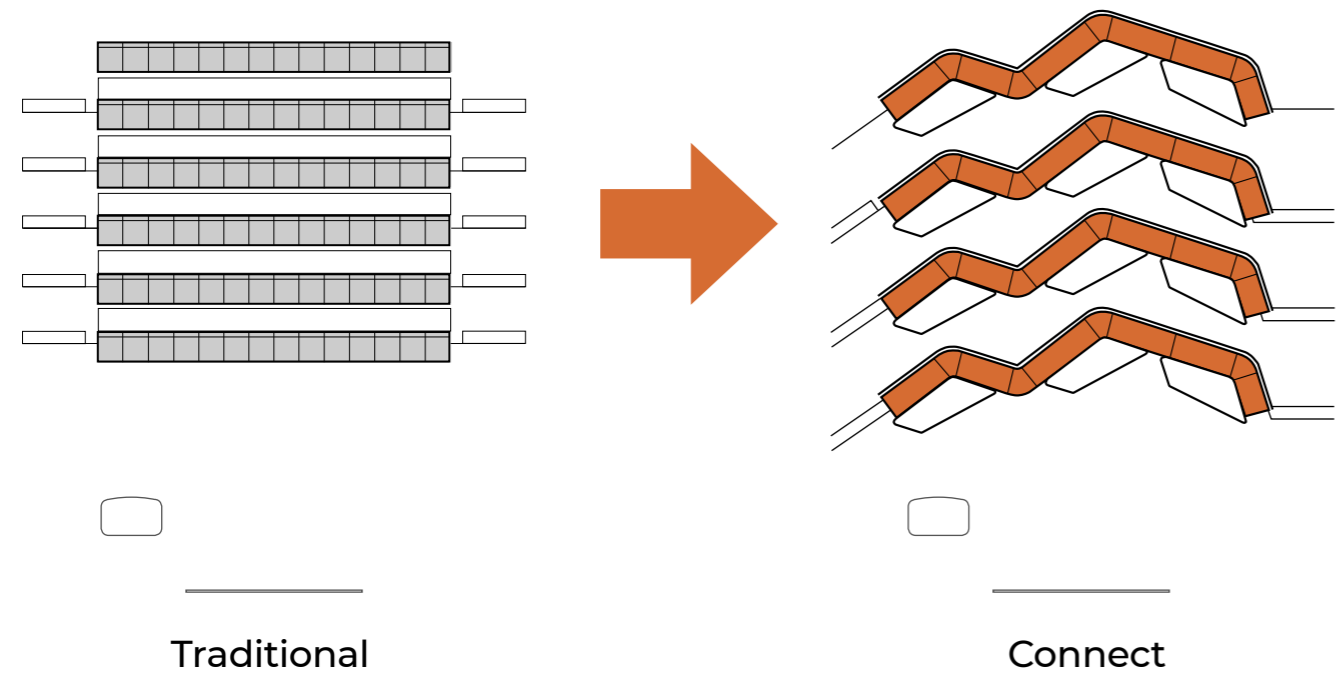

space saving

The multi-award winning **Connect** design reduces the overall space requirement by combining a didactic lecture theatre with a collaborative break-out space.

creating

Informal groupings that do not require alteration to achieve didactic or collaborative modes.

Connect is...

connected

- Attached tablet and PC facilities
- Full conferencing facilities
- Interactive image projection
- Full lecture & conference capture

A multi award-winning design that moves the teaching debate forward.

*“Feedback from students, staff and visitors
has been spectacularly positive, and we all
really enjoy working in the building”*

Professor Tony Hodgson, Dean of Loughborough
Design School

Leeds University

"To say that the post refurbishment results show a 'Cinderella like' transformation in satisfaction ratings would not be untrue."

James Curtis of Curtis Associates Research (Client Appointed Independent Researcher)

Leeds University

Race Furniture is at the forefront of theatre and lecture hall seating design, with expertly crafted installations in concert halls, national theatres, lecture theatres, conference halls, schools and cinemas across the world.

Race's portfolio encompasses standard, customised and bespoke products, providing a complete technical and creative service tailored to ensure the perfect solution.
